ENTERPRISE MANAGER for SSC and FoD is a management console, enabling capabilities such as drag-and-drop between SSC and FoD instances, SSC server distribution for software development teams, and Application/Version migration for SSC server hardware or version upgrades.

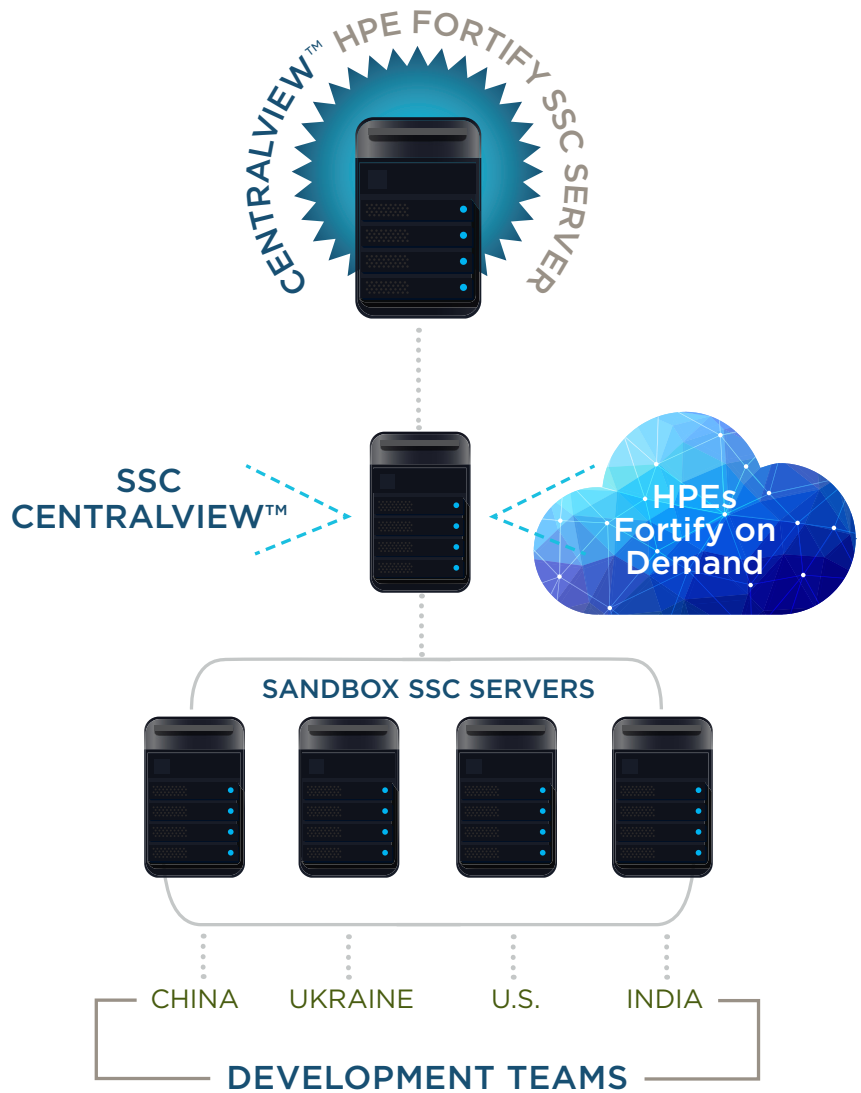

KEY FEATURES

- Simple to install and configure
- Single management console for all SSC instances across the Enterprise
- Drag-and-Drop functionality
- Easy SSC migration, provisioning, and hardware/software upgrades
- FoD data integration
- Birds eye view of all applications and versions

SSC CENTRALVIEW™

CENTRALVIEW™ for SSC and FoD is an application for extending the functionality of HPE's Fortify Software Security Center (SSC) server and Fortify-on-Demand (FoD). It works seamlessly with Enterprise Manager to provide automated enterprise roll-up of selected SSC and FoD Application/Version results, to a centralized HPE Fortify SSC Server, for a CentralView™ into the security posture of the Enterprise Application Landscape.
